(LISTED BELOW)

SUPPLEMENT TO
REPORT NO.

1. Emil Bührle, the Swiss industrialist, has recently concluded an agreement to sell ordinary rockets to the British Admiralty. These rockets are described as being of good quality.
2. At the Press-und-Stanzwerk A.G. in Eschen, Liechtenstein, which is owned by Bührle, research in the development of liquid rockets is going on. Dr. Alfred Gerber is in charge of this project. He is a Swiss citizen and holds the rank of major in the Swiss Army. Gerber is a graduate of the Federal Technical Institute in Zürich (ETH) and a pupil of Professor J. Ackeret. He is in his early thirties. In addition to working for Bührle at Eschen, Gerber also serves as vice director of Bührle's Contraves firm in Zürich and is said to have some responsibility at Bührle's factory in Oerlikon.
3. While Dr. Gerber is in charge of the entire project at Eschen, the man responsible for the research work is a Swiss citizen named Tommen, fnu. The extent of progress achieved in connection with this research project is not known. It is known, however, that no serious accidents have occurred despite the technical difficulty of the work.
